5.2 Third party inspection should cover the following :

Manufacturer will carry out physical / chemical / mechanical / hydrostatic / NDT test etc. For raw materials and finished pipe as per relevant API specification (latest edition) for all the pipes i.e. 100%. Third party will check and verify manufacturer's test data records, reports etc. of raw materials and finished tubes in respect of all pipes i.e. 100%. Over and above checking and verification of records and reports, third party will carry out inspection for the followings on percentage basis given below in his presence :

a) Raw Material Inspection for Chemical Composition & Mechanical Properties : 10% of number of heats of raw materials 10% of number of plates will be tested at random by the third party. The minimum number of test for raw materials either from heats or plates is 5(five). The raw materials will be tested for chemical composition and mechanical properties as per relevant codes.

b) Finished Tube Inspection :

- i) Checking dimensions, wall thickness, end bevelling, threading/gauging, surface imperfections etc. - 5% of the tubes at random will be checked/tested by Thrd.Party.
- ii) Checking chemical composition and mechanical properties - 5% of the tubes will be tested by the third party.

c) Witnessing NDT through ultrasonic testing/magnetic particles method/other methods.

- i) Longitudinal Defects : 5% of the tubes at random will be tested by third party.
- ii) Transverse Defects : 1% of the tubes at random will be tested.

d) Hydraulic Testing : 10% of the tubes at random will be tested by third party. The above test procedure is for offering to third party, whereas manufacturer will do 100% internal testing before offering to third party. The manufacturer will forward the various test certificates of their internal testing after checked/varified/certified by the third party.

Identification Mark :

- a) 'OIL' need to be die stamped/paint stencilled on both sides of each length of pipe within a distance of 1(one) meter from the end.
- b) Manufacturers name/trade mark is to be die stamped/paint stencilled on each length of pipe.
- c) Length of each pipe in metres and centimetres must be paint stencilled on the pipes.

**Tender No. & Date : SSG2149P20/01                      06.08.2019**

- d) OIL's Order No. is to be paint stencilled on each pipe.
- e) API/BIS Monogram is to be die stamped/paint stencilled on each length of pipe (API or BIS to be typed as per requirement).

Mill test pressure : Each joint of pipe shall be tested hydrostatically to the recommended pressure at the mill in accordance with the relevant API specifications.

**6.0 WARRANTY :**

The supplier shall warrant their all tubulars to be supplied against the order shall be free from all defects and faults in materials, workmanship and manufacture shall be in full conformity with specified API standard. This clause shall be valid for 12 months from the date of despatch. The defective materials rejected by the purchaser shall be replaced by the seller at his own expense immediately.
